## Art Education Classes

### About COF Art Classes:

Visual art education teaches kids visual literacy - how to interpret, criticize and use visual information to make choices based on what they see. We use a variety of materials and techniques in our classes. Art education strengthens problem solving and critical thinking skills and develops a sense of innovation which is important for people of all ages!

COF art classes will encourage kids to delve into their imagination and develop their own personal style as they paint and create, whether they are a beginner or have previously acquired skills.

Each session takes kids to the next level as they explore various techniques and mediums.
